Silver Oak College of Engineering and Technology (SOCET) do not create only Engineers but we create leaders and give good citizens to the Country. We also make them good human being with high Human values and also a Patriot who have lots of love for its country and its peoples.

As we all know that we are an inseparable part of the Society. Any problem in the society will have an effect to us also to some extent. Problems like illiteracy, lover human values, dishonesty towards system as well as poverty pollute the atmosphere of the society very badly.

Several NGOs in India are working on various problems and also becomes successful in finding the solutions for some of them. Taking inspiration from the hard work of these NGOs only, SOCET has started a Social Service Club named “HAPPY TO HELP”.

We try to encourage the youth that they should understand the importance of giving social service in the society. They must understand that how the Indian Democratic & Government system works. We try to encourage each and every youth of the country to be part of the development of the Country by bringing some change or development or growth in the society by its own efforts.
Introduction

This report presents you that how our Happy to Help team worked while completing their first activity which is for the encouragement of all the school going children who are the children of the caretakers’ of the college.

We decide to do this activity with these children instead of other children from the outside schools, because we think that “CHARITY BEGINS AT HOME”. If we will not take care of our own peoples then how we can serve good to our society.
ABOUT THE ACTIVITY

Our first activity which we carried out is for the poor children who are studying from 1st to 7th std and to encourage them to study hard and do something good and big in their life. We decide to facilitate them with some stationary which can be used by them in their study works. We got the cost of the stationary items by carrying out an Activity named “Pasti Ki Masti”

In this activity we decided to go to each and every student asking them to help us in our initiative for providing stationary items to the school going children and encourage them to study and do something good in their life.

We collected pasti (paper and plastic) from the students. For taking our this initiative to each and every student our volunteers of first semester only take up the responsibility for going class to class announcement and aware everyone in the college about what they were doing.

As we don’t want to disturb the lectures of the volunteers of the first semester we completed the process of announcement in two days. We gave the time of more than a week to all the students of the college to give the pasti to us so that we can carry out the activity.

After a week we collected a total pasti of 94.07 kg and sold it to an NGO, WOW – (WASTE OUT OF WEALTH) who takes up all the dry recyclable pasti (Paper, Plastic, Metal, Glass, Wood and E-waste and old clothes) giving door to door service and paying a good price of the pasti.

The money which we generated from this selling of pasti is Rs. 787. Then we used this amount to build several stationary kits and to distribute it among the children. While working in this activity, we try to encourage the small children to go to school and perceive a good education because we know the importance of proverb/tag line that,
“HERE ARE SOME IMAGES OF THE ACTIVITY”
