

SOCET VISION- The driving force of future technology

Virtual Reality - A world where we can roam wherever we want to. Silver Oak College of Engineering and Technology, Ahmedabad picked up one of the rarest opportunities to transform Virtual Reality into Reality. Inspired by various trending devices like Oculus, Microsoft HoloLens, Google Cardboard, the CE/IT department of Silver Oak College of Engineering and Technology, has taken an initiative of making its students aware about Virtual Reality with the help of in-house product named "SOCET VISION".

The gadget is an upcoming Virtual Reality head-mounted case that uses smartphone as a display. It has been developed exclusively by the CE/IT department of SOCET. With the efforts of Prof. Satvik Khara (Head of Department, CE/IT) and the students of Silver Oak College of Engineering and Technology, this device has been developed and it will be made available for the students and all the other guests on the day of Annual Techfest - TALAASH '15 on 24th-25th March, 2015.

Intense R&D has been done by students with the help of high-end Graphics hardware like Nvidia GeForce GTX 690 and the Nvidia Quadro 6000. Meant for Entertainment, Education, Gaming, and Simulation, the headset marks another milestone in the field of technology.

Students have been working on the technical aspects of "SOCET VISION". They are working on the software and applications required to understand and reveal more features and functionalities of the device. The initiative has made Silver Oak College of Engineering and Technology one of its own kind, thus adding feathers to its cap.
