<b>Session Conducted by</b>	:	Silver Maple Club (SMC) Coordinators ( <i>SOCET &amp;ASOIT</i> )
<b>Location</b>	:	Various Locations In The Campus

**Session Brief:**

**Silver Maple Club** of Civil Engineering Department has organized Electronic Waste Collection Drive partnering with the CEE (Centre of Environment Education).

The aim of this e-waste collection drive is to inform and motivate people about the ill effects of electronic waste if not discarded properly. To begin with this drive, volunteers have been selected from the 1<sup>st</sup> year by the SMC members, and are groupwise assigned to campaign in various classes throughout the college.

The campaigning process was started by printing posters which were carried to various classes to give an overview of the campaign to all students and faculties. Then it were pasted on notice boards around the college. It further proceeds by grouping of the volunteers under 8 leaders. Volunteers are instructed how to proceed with the campaigning while going around the classes assigned to their respective groups. Boxes are placed in the prime location of each and every building block so that the box is fairly visible and the students and faculties can start placing their e-waste.

The drive concluded on the day of 12<sup>th</sup> march (Tuesday) when the members of the CEE arrived in the college and took away the electronic waste to dispose it off or to recycle it and not to let it destroy the environment.
